

Ethan Luu

Aurora, CO | (303) 564-4782 | ethanluu02@yahoo.com | [linkedin.com/in/eluu02](https://www.linkedin.com/in/eluu02) | GitHub: eluu02

Summary Of Qualifications

- Programming languages: Java, Python, SQL, C, C++, JavaScript, Scala
- Operating systems: Linux, Mac, Windows
- Knowledge of data structures, project management, data analysis, agile software development, software testing, Hadoop MapReduce, and relational databases
- Experience with Microsoft Office suite, troubleshooting systems, and customer service

Education

Bachelor of Science in Computer Science
Colorado State University, Fort Collins, CO

May 2025
GPA 3.2

Master of Science in Computer Science
Colorado School of Mines, Golden, CO

Expected May 2027

Projects

Company Management Web Application

January 2025 – May 2025

- Developed web application in a team while following Agile software development practices
- Implemented logic in backend using Java, REST APIs for data transfer, and SQL to store user account data as well as chess match information according to client requirements while following clean code practices
- Utilized GitHub for project management and version control, Postman for API testing, Code Climate for code coverage and technical debt analysis, and JUnit to test functionality

Spring 2025 Colorado State University Hackathon Rover Challenge

March 2025 - March 2025

- Developed Pygame to navigate a virtual rover in a map of geospatial vector data given by shapefile using the A-Star path finding algorithm with Euclidean distance between the start and end point to find shortest path
- Utilized python programming language and AWS environment as well as Pygame package to create game window, GeoPandas package to read spatial data, and NetworkX package to create graphs from retrieved data

Chess Web Application

August 2024 - December 2024

- Developed web application in a team while following Agile software development practices
- Implemented logic in backend using Java, REST APIs for data transfer, and SQL to store user account data as well as chess match information according to client requirements while following clean code practices
- Utilized GitHub for project management and version control, Postman for API testing, Code Climate for code coverage and technical debt analysis, and JUnit to test functionality

Speed Typing Experiment Application

January 2024 - May 2024

- Developed Python app to test typing speeds with different keyboard layouts using Tkinter package to create GUI for app and PIL (Python Imaging Library) to display keyboard layout image
- Conducted user experimentation with random students from Colorado State University to find the most optimal keyboard layout besides the standard QWERTY layout

Work Experience

Teaching Assistant, Colorado School of Mines
Golden, CO

October 2025 - December 2025

- Held office hours to support students with programming assignments and exam preparation
- Graded assignments and projects while providing detailed feedback to improve student understanding
- Collaborated with instructional staff to ensure consistent grading standards and effective course delivery
- Assisted with exam proctoring and enforcement of academic integrity policies
